DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 15-20, drawn to compositions comprising bimodal ADN, classified in class 149, subclass 9.1.
 - II. Claims 11-14 and 21-24, drawn to compositions not comprising bimodal ADN, classified in class 149, subclass 19.1.

The inventions are distinct, each from the other because of the following reasons:

The inventions are mutually exclusive by virtue of their non-overlapping content of 100-200 micron ADN.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
3. During a telephone conversation with Ms. Charlene Haley on May 3, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-10 and 15-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-14 and 21-24 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1751

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. This application is in condition for allowance except for the presence of claims 11-14 and 21-24 to an invention non-elected with traverse. Accordingly, those claims have been cancelled by the examiner.

Examiner's Amendment

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 11-14 and 21-24 were cancelled.

7. The following is an examiner's statement of reasons for allowance: The closest prior art of record is Highsmith et al. US 6,362,311 B1 and Wood et al., US 6,074,581. The Highsmith reference discloses propellant compositions comprising the components recited by applicant, but not a particle size for the ADN. The Wood reference teaches a particle size for ADN which encompasses the particle size ranges recited by applicant, but not the ratio of specific particle sizes required by the claims. Accordingly, the claims are not obvious over the prior art of record.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (571) 272-1316.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
